

Before measuring your ring size, be sure this guide is printed scaled to 100%. You can check the accuracy of your print by positioning a credit card or bank card on the line below.

To find out your ring size, put a fitting ring on one of the circles below. Placed on the right circle, you should only see the coloured area, with no white space. If between two ring sizes, we recommend choosing the larger one. Making the ring smaller is easier than the other way round :-)

Circumference in mm

Diameter in mm
